

Frontend Developer/UX Designer

Want to make an impact with your skills? We are looking for an adventurous frontend developer to help us end financial crime.

At **hawk:AI**, we run a money laundering detection & investigation platform, delivering peace of mind to financial institutions. This is achieved via targeted application of Artificial Intelligence in the Cloud, delivering new levels of process efficiency. Our philosophy for the user experience of our platform is simple: it explains complex correlations at first glance – 21st century style, no explanations and manuals necessary.

Your role

- › Help design **intuitive visualizations** for surfacing complex relationships identified by our machine learning driven platform.
- › **Design and implement** the UX of prototypes and solutions and test them with clients and experts
- › Introduce and evolve **state-of-the-art UI technology** and create consistent excellency in our user experience
- › Code, iterate, and deliver to kick-start newly founded ventures
- › **Take responsibility** within a team of highly skilled experts, with love for details and an eye for the bigger picture
- › **Grow** by proving your skill, using state-of-the-art tools, experiencing business and learning something new every day
- › **Communicate results** in a way that is informative and constructive
- › Have knowledge of the server-side of things to an extent that it allows you a level of **independency**

Your background

Frontend Development/UI Design is your passion: **multi-year expertise** in WEB-UI technologies, as well as experience in the mobile APP space (e.g. React, Selenium, Microservices)

You have a “feel” for user experience: Experience with **prototyping tools** (e.g. Sketch) and some UX examples to show from past experience

Agility is your second name: Strong **willingness** to deliver, always hands-on. In the team, with the team and for the team

What we offer

- › Working on the very challenging quest in creating and constantly improving the understandable, highly intuitive face of a Machine Learning driven platform
- › A **great team with vast experience** in data science, high availability systems, financial space
- › Working closely with successful serial entrepreneurs and senior advisors, learning about **building a world class tech organization**
- › Work in the heart of **Munich**, near the Alps
- › Being part of a **driven team**, determined to fight money laundering and disrupt a global industry
