

Full Stack Developer

Want to make an impact with your skills? We are looking for an adventurous full-stack developer to help us end financial crime.

At **hawk:AI**, we run a money laundering detection & investigation platform, delivering peace of mind to financial institutions. This is achieved via targeted application of Artificial Intelligence in the Cloud, delivering new levels of process efficiency.

Your role

You will:

- › Code, prototype, iterate and deliver to kick-start newly founded ventures
- › Introduce **state-of-the-art** technology or processes for web, java or DevOps
- › Contribute to the **growth** of the ventures by taking a key role in our technical team
- › Take **responsibility** within a team of highly skilled experts, with love for details and an eye for the bigger picture
- › Grow by proving your **skill**, using state-of-the-art tools, experiencing business and learning something new every day
- › Be responsible for working software on the right level of **quality** - in idea prototyping and productive solutions
- › Be building and operating a **resilient product** that makes the users' lives easier
- › Deliver meaningful pieces of software that work in short cycles

Your background

Technology is your passion: Strong expertise in state-of-the-art Java, Cloud and DevOps technologies (e.g. Kafka, Kubernetes, Microservices)

Resilience and Security is your bread and butter: Experience with **high performance**, resilient, secure systems

The cloud is your second home: You have worked with **cloud platforms** such as AWS, Google Cloud, Microsoft Azure

Agility is your second name: Strong willingness to deliver, always **hands-on attitude**, e.g. in the team, with the team and for the team

What we offer

- › One of the most exciting Machine Learning use case – **fighting financial crime globally**
- › A **great team with vast experience** in data science, high availability systems, financial space
- › Working closely with successful serial entrepreneurs and senior advisors, learning about **building a world class tech organization**
- › Working in the heart of **Munich**
- › Being part of a **driven team**, determined to disrupt a global industry
